WHAT DO GRADUATES DO?
The expectation for track graduates is to assume leadership roles in general internal medicine private practice, hospitalist medicine, or academic general internists.

HOW DO I APPLY?
Apply using the NRMP number 1652140CO for the Categorical Program and indicate your interest in the track within ERAS via the check box. If space allows, applicants identifying an interest after matching to the Categorical Program also may be considered for a position in the Generalist Track.

WHAT MAKES THIS TRACK DIFFERENT?
**Advanced Ambulatory Medicine:** Advanced training in special topics is available for track residents. Examples of these topics include musculoskeletal conditions, outpatient psychiatry, dermatology, neurology, practice management, and many more electives that help to prepare the generalist physician.

**Advanced Hospitalist Medicine:** Advanced training includes topics important to the hospitalist physicians, such as hospital medicine, medicine consults, patient safety electives, and procedure service.

**Practice Partnership:** Track residents engage in practice partnership with one of the generalist faculty during their ambulatory rotations. One session per week is spent seeing patients one-on-one with a faculty mentor. This experience is in addition to the resident's own continuity clinic.

**Patient-Based Master Clinical Seminars:** A master clinician works through the diagnosis and treatment of a complex case in iterative fashion. The patient involved in the case attends the seminar and reports his/her perspective of the experience.

**Clinical Vignette Working Group:** The generalist track residents work together in their PGY2 and PGY3 years to develop, publish, and present a clinical vignette.

**Health Policy Curriculum:** In conjunction with the Global Health Track, generalist residents and faculty meet once a month to discuss and debate issues and related health policy in a journal club format.

GENERALIST TRACK **PGY1**

**FIVE TO SIX MONTHS:** Inpatient Floors
- General Medicine: *Three to four months*
- Cardiology: *One month*
- Hematology/Oncology: *One month*

**ONE MONTH:** Medical ICU
**ONE MONTH:** CCU
**ONE MONTH:** Ambulatory Block

**TWO TO THREE MONTHS:** Electives
**ONE MONTH:** Night Float/VA Emergency

Continuity clinic throughout year except while in ICU/CCU.

GENERALIST TRACK **PGY2**

**FOUR MONTHS:** Inpatient Floors
- General Medicine: *Two months*
- Cardiology: *One month*
- ICU: *One month*

**ONE MONTH:** Ambulatory Geriatrics
**ONE MONTH:** Ambulatory Block
**ONE MONTH:** Ambulatory Heme/Onc

**TWO MONTHS:** Special Electives
**ONE MONTH:** Emergency Department
**ONE MONTH:** Medical Education and Physical Diagnosis

Continuity clinic throughout the year except while in ICU/CCU.
Practice Partnership throughout the year while on consults and ambulatory months.

GENERALIST TRACK **PGY3**

**THREE MONTHS:** Inpatient Floors
- General Medicine: *Two months*
- ICU or CCU: *One month*

**THREE MONTHS:** Special Electives

**ONE MONTH:** Medicine Consults/Stroke Service
**ONE MONTH:** Night Float/VA Emergency
**ONE MONTH:** Scholarly Project Elective
**ONE MONTH:** Night Float/Emergency Department

**TWO MONTHS:** Ambulatory Block

Continuity clinic throughout the year except while in ICU/CCU.
Practice Partnership throughout the year while on consults and ambulatory months.

**MISSION STATEMENT**

Through an innovative curriculum of individualized training and mentorship, we are dedicated to developing physician leaders who will actively transform the science of medicine, and provide compassionate, evidence-based care to their patients.
