Key questions defining research program:
  • Can technology be used to improve population hypertension management?

Key words describing research program:
  • Hypertension
  • Patient engagement and self-management
  • Home BP monitoring
  • Medication adherence and health behaviors
  • BP measurement

Titles for shovel-ready research projects:
  • eHealth and hypertension - automated, bidirectional texting with feedback for home BP monitoring
  • Medical informatics and hypertension - innovations in the EMR to aide PCP management of hypertension
  • eConsult for resistant Hypertension – Explore development and implementation
