Key questions defining research program:
1) Radionuclide and multimodality imaging in CAD: diagnostic and prognostic role
2) Imaging in cardiac amyloidosis: diagnostic and prognostic role
3) Mechanisms of LV dyssynchrony
4) Gated blood pool SPECT imaging of right ventricular function
5) Appropriate use criteria in cardiology

Key words describing research program:
1) Nuclear cardiology
2) Amyloidosis
3) RV function
4) Appropriate use criteria

Titles for shovel-ready research projects:
1) Nuclear cardiology database
2) Amyloid database
3) Cath FFR and SPECT ischemia correlation

Data sources for shovel-ready research projects:
1) Databases
2) Ongoing prospective studies
