Key questions defining research program:

- To determine if there has been a change in clinical practice following use of molecular marker testing in the management of indeterminate thyroid nodules
- To determine the duration and frequency of specialty clinic follow up for ATA low risk thyroid cancers

Key words describing research program:

- Thyroid Cancer
- Thyroid Nodules
- ATA
- Molecular Markers

Titles for shovel-ready research projects:

- Has the use of molecular markers changed the treatment paradigm of cytologic indeterminate thyroid nodules?
- Prognosis of ATA Low risk Thyroid Cancer Patients over prolonged follow up

Data sources for shovel-ready research projects:

- Multidisciplinary Thyroid Center
- Pathology Database
- Endocrine Surgery Database
