Key questions defining research program:
1) Infectious complications in Transplant recipients
2) Telemedicine for infectious diseases

Key words describing research program:
1) Fungal infections
2) CMV
3) Viral infections
4) Immunosuppression
5) Telemedicine

Titles for shovel-ready research projects:
1) Aspergillus Calidoustus infections in solid organ transplant recipients
2) Adenovirus infection in solid organ transplant recipients
3) CMV resistance in non-lung transplant recipients
4) Aspergillus perinephric abscess in a kidney transplant recipient
5) Infectious Diseases consults via Telemedicine

Data sources for shovel-ready research projects:
1) Chart review of small case series
2) Chart review of small case series
3) Chart review and literature review
4) Case report
5) QI project
