Key questions defining research program:
1) Efficacy and safety of fecal microbiota transplant for recurrent Clostridium difficile (rCDI) infections
2) Epidemiology of rCDI infections in immunocompetent and immunocompromized patients

Key words describing research program:
1) FMT
2) Fecal donor screening
3) Fecal shedding of latent viruses
4) FMT donor recruitment

Titles for shovel-ready research projects:
1) Epidemiology of latent virus serostatus among volunteer vs patient-directed FMT donors
2) Descriptive epidemiology of FMT recipients and prospective FMT candidates

Data sources for shovel-ready research projects:
1) Medical patients charts
2) “FMT for rCDI” Registry
