Key questions defining research program:
1) Safety of antimicrobial therapy for specific infections
2) Efficacy of antimicrobial regimens for specific infections
3) Risk factors for development of drug-resistant isolates

Key words describing research program:
1) Antibiotic stewardship
2) Antibiotic resistance
3) Drug adverse events

Titles for shovel-ready research projects:
1) Outcomes in patients on nafcillin and oxacillin
2) Antibiotics for VRE bacteremia

Data sources for shovel-ready research projects:
1) Patient charts
2) Microbiology data
3) Pharmacy data
